CHECKLIST FOR ACTION ITEMS

The question of who budgets for what computer and for ADP-associated equipment and services must be settled and specific instructions must be given to the offices. O/PFB should be the authority for such decisions.

Definitions of objectives, goals and projects are necessary and are to be given to offices. The sense of the terms as well as the literal definitions should be made clear.

Revise the wording of DDBMT objectives so that they are precise and still allow the offices enough working latitude. Coordinate with offices as soon as possible.

OSI and FMSAC both want to treat their program call narratives in both subcategories, Estimative and Current and Research and Analysis. Since O/PFB has said that we may do what amounts to this next year, it seems only logical to lay the groundwork this year. A decision from [REDACTED] will be necessary to settle this.
